

**Michael Flood** BE FIEAust CPEng (Biomedical) NER APEC engineer

Michael Flood began his career in medical devices in the late seventies with qualifications in Engineering.

Over in excess of forty years, he has work in all facets of the medical devices industry, within manufacturing, health care delivery, regulation of medical devices and now acts as a consultant to all three sectors.

He is -

- active in a number of standards development committees for medical devices, both within Australia and internationally,
- has been a member of the Health and Food Sector Standards Board of Standards Australia,
- Currently is Chairman of the College of Biomedical Engineers within Engineers Australia,
- held visiting appointments at several Australian Universities, and
- Held an appointment as adjunct lecturer in biomedical engineering at the Australian National University.

And now

- Assists manufacturers through the regulatory maze to market approval,
- Provides consultancy and training services to developing economies in South East Asia,
- Provides consultancy services in health technology assessment and biomedical engineering practice and management.
